Visiting your GP Surgery during the Covid-19 (coronavirus) Pandemic

Your GP surgery is open for urgent and routine problems although access to services is currently limited as we have been advised to reduce footfall on the premises in order to keep our patients and staff safe.

All appointments will be via telephone, video or online assessment initially. Most problems can be dealt effectively in this way – a face-to-face appointment will only be arranged if it is clinically necessary.

Your surgery has steps in place to ensure that it is safe should you need to attend in person. These measures include socially-distanced waiting areas, hand sanitisers and members of the team wearing personal protective equipment e.g. masks/visors. To help us:

- Please do not enter the practice unless you have been advised to
- Please attend alone, or with only 1 carer/parent as necessary
- Please bring your own face-covering

Please practice self-care where you can; you can find advice online at 111.nhs.uk and your Community Pharmacist is also available for advice.

Finally, it is important that you do not ignore symptoms that may need medical attend. Please ring the surgery if you have any concerns.

Thank you for all your patience and support during this difficult time
